Subject: Bee-Relevant Residue Database: Thiamethoxam Example
Attachments: 060109 Thiamethoxam Combined Residues 4 Pollinator Team 5-26-20.xlsx

Pollinator Team,

Thanks for your input on our call yesterday regarding the path forward for establishing an EFED database (to be continually populated by our contractor) of bee-relevant residue data.

I've attached an example for thiamethoxam which contains 3 of the studies for illustrative purposes (the complete spreadsheet for thiamethoxam is about 3500 records long and I expect to approach 5000 when complete.

For context, this spreadsheet is the format I will be sending to the Pollinator Research Task Force (PRTF) contractor to use in their analysis. I expect it will require some modification to meet EFED's needs as a repository for said data. Please disregard the "lookup" tab and "Thia LOE Estimate" tab; these will be eliminated in the final version delivered to the PRTF when all formulas are removed.

To that end, I have the following actions which I am in favor of implementing for the EFED database version:

1. Include relevant fields from EFED ingredients database (e.g., chemical, PC code, MOA) (Nick, I'll reach out to you on this at the appropriate time)
2. Decide whether Excel or Access should be the platform (Nick, I especially invite your additional thoughts on this)
3. Obtain your input on additional fields that we believe should be included
4. Develop a QAPP (Note: these data have been QA'd by our contractor via the individual spreadsheets; but I suggest a final QA step (e.g., checking summary stats) given my manipulation of data (moving columns, populating missing metadata).
5. Develop contractor SOP for data entry (including methods for streamlining data entry)
6. Reach out to Lee to discuss whether this should be managed as part of EISB (Lee, I'll give you a ring on this to bring you up to speed).

Given the LOE involved, I think we should brief management at the SSA forum at some point in the near future before we get too far down the road. I can't do it this Thursday as I'm on leave. But I can do it for the next meeting if you all agree.

Thanks again and please provide your input to me (e-mail is fine) by **Tue, June 23**.

Best,

Keith

Subject: Pollinator Team Biweekly meeting

When: Tuesday, May 26, 2020 11:00 AM-12:00 PM (UTC-05:00) Eastern Time (US & Canada).

Where: S-10771

Hello Team

I noticed that the invite fell off my calendar for the new time we scheduled. Here it is now.
